# GARAGE CEILING STORAGE RACK

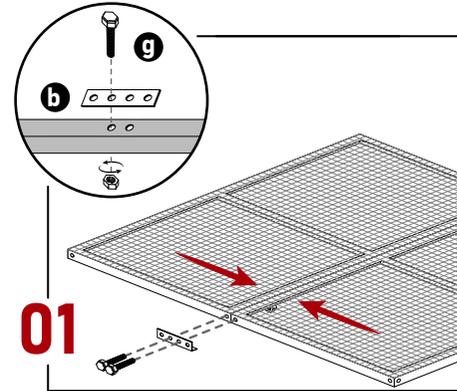

INSTRUCTION MANUAL

## PARTS LISTS

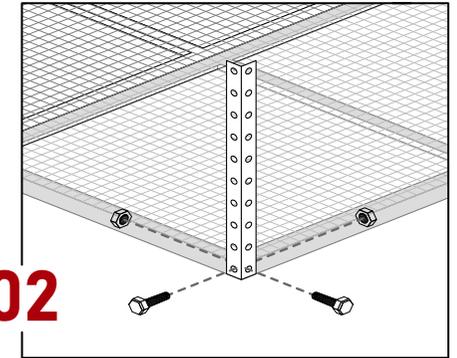

## DESCRIPTION

The Ceiling Storage Rack is designed to store your items off the garage floor. The storage rack is perfect for utilising garage ceiling space to store seasonal and unused items. The rack is made from powder coated steel and is designed to be mounted onto the ceiling, freeing up floor space. With all necessary hardware included you can have it mounted with ease. Once mounted, the rack allows for easy loading and unloading of any items. With a weight capacity of 270kgs it has the ability to hold a large amount of goods.

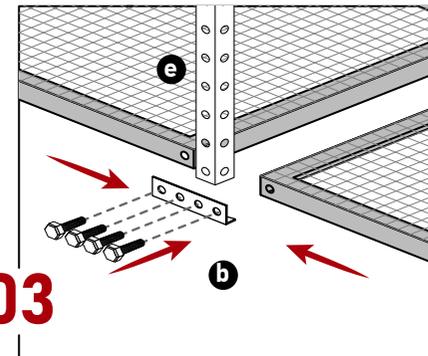

### Attach the Top base:

Connect the top base units and brackets using the provided nuts and bolts. Ensure all joints are firmly tightened to create a stable upper frame.

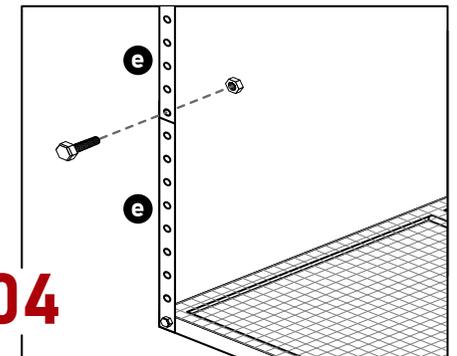

### Insert the corner legs:

Attach the corner legs to the base frame using nuts and bolts. Tighten securely so the legs stand straight and stable.

### Connect the Middle legs:

Install the middle legs to reinforce the structure. Secure them firmly to the base using nuts and bolts.

### Attach middle and corner legs :

Add the additional middle and corner leg sections to increase the rack's height. Fasten all bolts tightly to prevent any wobble.

Connect Flooring

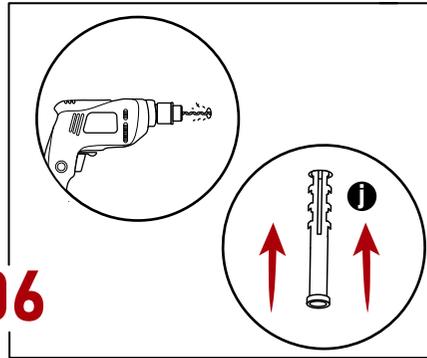

05

**Connect the leg support:**

Attach the support braces between the legs using nuts and bolts. These supports add rigidity and overall stability to the rack.

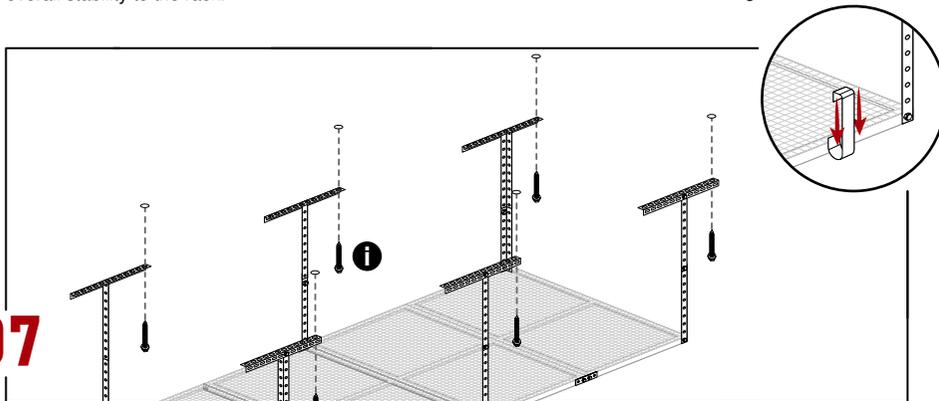

06

**Prepare Ceiling Mounting Points:**

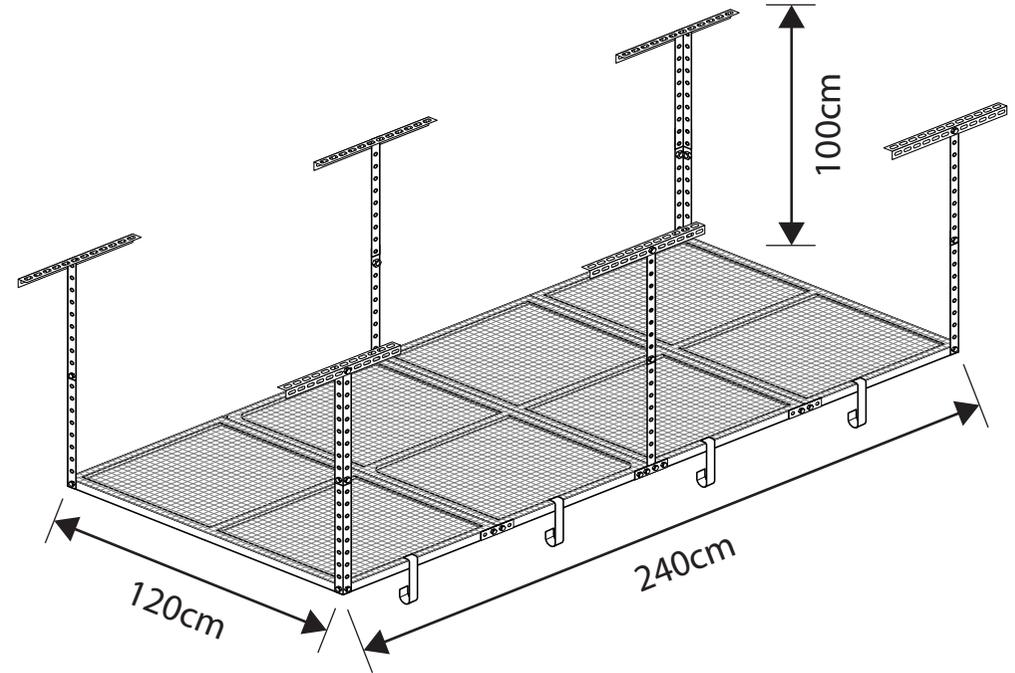

Measure and mark the ceiling. Drill holes at the marked points and insert the wall plugs until they sit flush with the surface for a strong anchor.

07

**Mount the Structure to the Ceiling:**

Lift the assembled rack and secure it to the ceiling using the screws provided. Once fully fixed, attach the hooks for additional hanging storage.

**FEATURES:**

- Adjustable height for all garages
- All mounting hardware included
- Includes 4x hooks for extra storage
- Integrated grid system- extra stability
- Rated up to 270kgs
- 5 Year Warranty

## **WARNING**

Clean the rack periodically using a damp cloth to remove dust and prevent dirt buildup.  
Inspect bolts, screws, and leg supports every 3 months to ensure they remain tight.  
Check ceiling anchors annually for any signs of loosening or wear.  
Avoid exposure to excessive moisture to protect the powder-coated finish.  
Do not overload the rack; always follow the 270 kg maximum capacity.

## **CARE INSTRUCTIONS**

Ensure installation is done on a strong, load-bearing ceiling structure.  
Use proper tools and safety gear when drilling and mounting.  
Do not attempt installation alone—always use at least two people to lift and support the rack.  
Do not climb or hang from the rack. It is designed for storage only.  
Distribute weight evenly across the rack to prevent stress on any single point.  
Keep children away during installation and when items are stored overhead.  
If any part becomes bent, loose, or damaged, stop using the product until repaired or replaced.
