HANDLING CAUTIONS

To ensure the durability and performance of your Soffia Aquamarino, please adhere to the following precautions:

- **Immediate Discontinuation:** If the watch or band shows signs of corrosion, sharp edges, or protruding pins, discontinue use immediately and contact us at support@soffiatimepieces.com.
- **Keep Away from Children:** Store the watch and its accessories out of reach of babies and children to prevent accidental ingestion or injury.
- **Avoid Hazardous Environments:** Do not expose the watch to volatile agents (e.g., polish remover, bug repellent), extreme temperatures (below 5°C or above 35°C), strong magnetic fields, static electricity, high humidity, strong vibrations, or dusty areas.
- **Allergic Reactions:** If you experience skin irritation or allergic reactions, discontinue use and consult a healthcare professional.
- **Disassembly Warning:** Do not disassemble or tamper with the watch, as this may void the warranty and damage its internal components.

SOFFIA

SCREW-DOWN CROWN

The Soffia Aquamarino is equipped with a screw down crown to ensure water resistance. Follow these steps to operate it:

- **Position 0:** Crown is fully screwed in – water resistant mode.
- **Position 1:** Position right after unscrewing the crown - winds the watch
- **Position 2:** Crown is pulled out gently one click after position 1 - date setting mode.
- **Position 3:** Crown is pulled 2 clicks after position 1 - time setting mode.

Locking the Crown: After setting the time or date, press the crown back into its normal position and turn it clockwise while gently pressing until it is securely screwed down (Position 0).

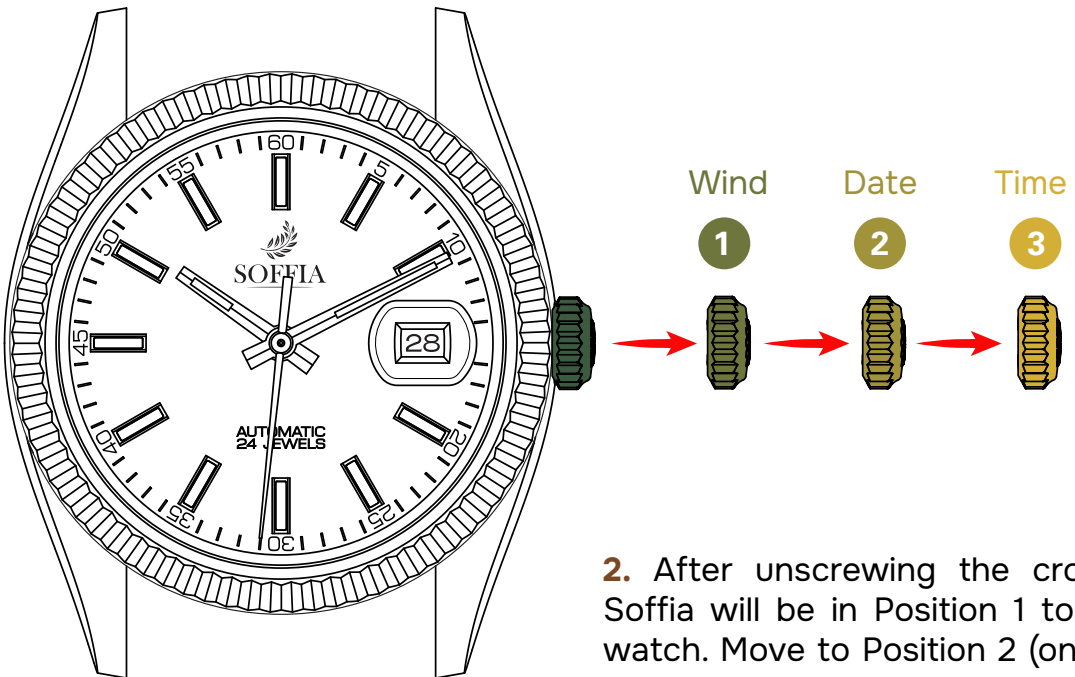
Unlocking the Crown: To adjust the time or date, turn the crown counterclockwise to unscrew it. Once unscrewed, pull it out to the desired position.

SOFFIA

HOW TO SET TIME AND DATE

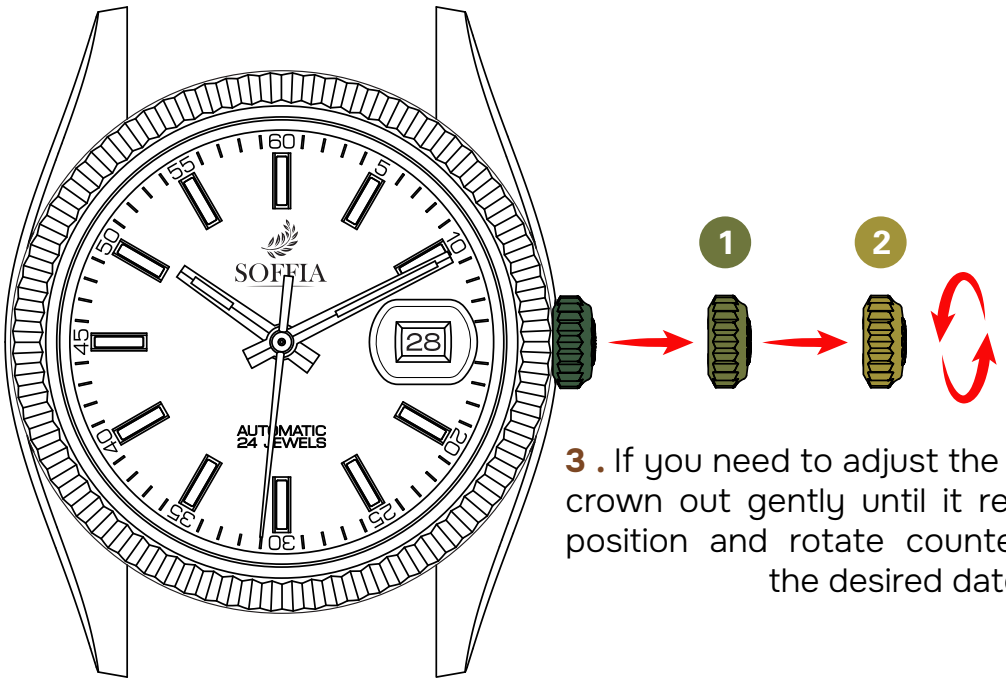
1. Unscrew the small circular dial on the side of your Soffia, which is called the crown. It will turn counterclockwise.

SOFFIA

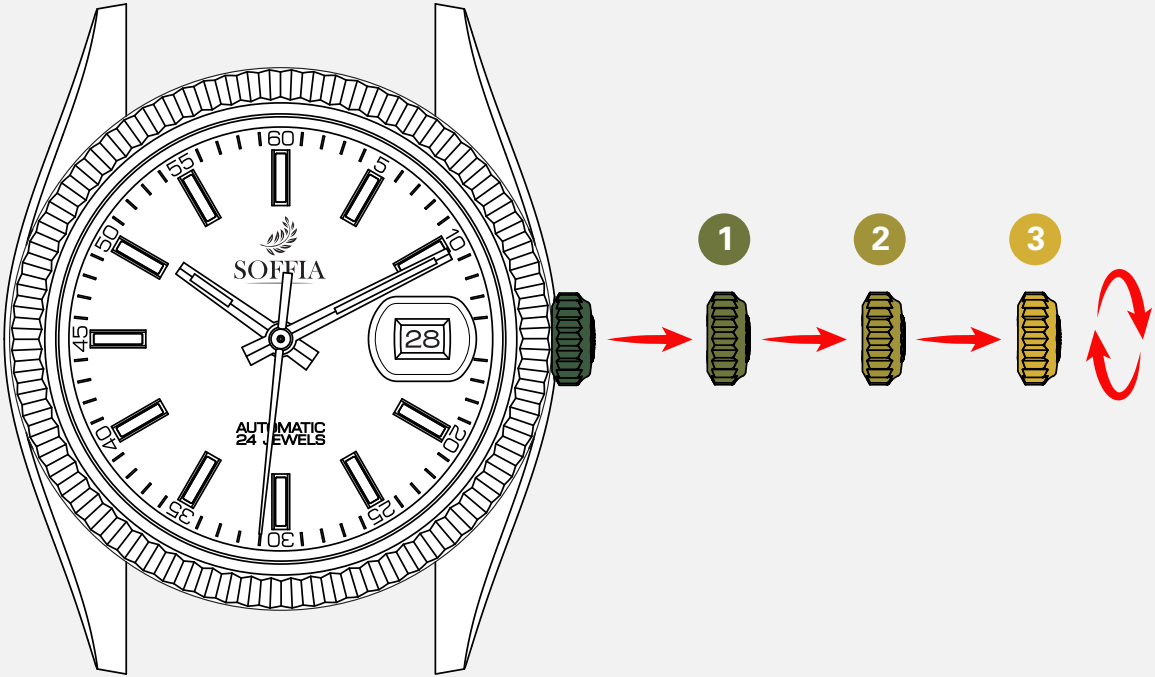


2. After unscrewing the crown, your Soffia will be in Position 1 to wind the watch. Move to Position 2 (one click) to change the date with a counterclockwise motion, and to Position 3 (two clicks) to set the time with a clockwise motion.

SOFFIA

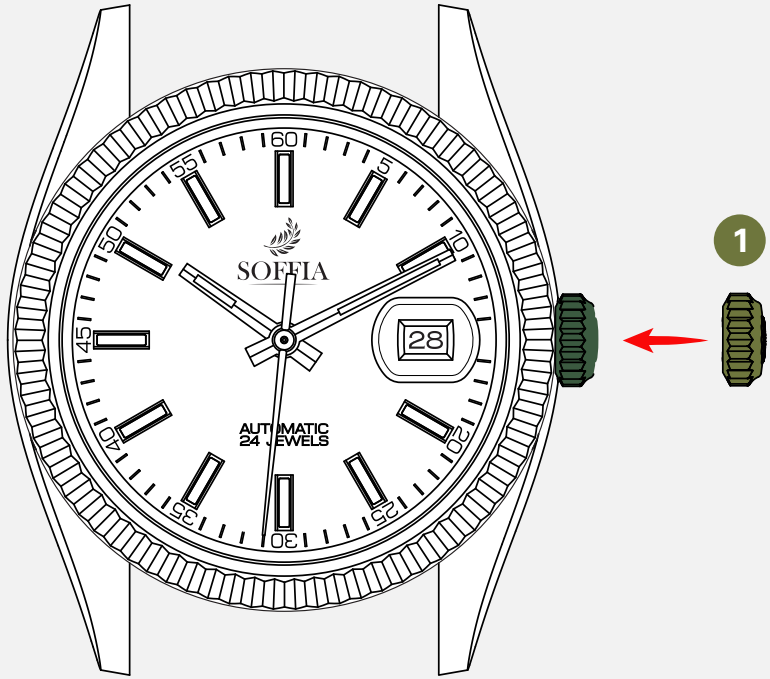


3 . If you need to adjust the date, push the crown out gently until it reaches second position and rotate counterclockwise to the desired date.



4. Then after adjusting the date push the crown out gently one more click to position and rotate the screw clockwise until the hands display the correct time.

SOFFIA



5. Once the watch is displaying the correct time and date, push the crown back into the position 1 and gently push it in screw it in place. It's important to fully tighten the screw because the crown's seal is what makes a Soffia waterproof.

MECHANICAL WATCH CHARACTERISTICS

The Soffia Aquamarino features a Japanese NH35 automatic movement with the following characteristics:

- **Automatic Winding:** The watch winds itself through the natural motion of your wrist. Regular daily wear will keep the mainspring wound. If the watch has not been worn for an extended period,wear it for 1–2 minutes to restart the movement.

Accuracy of Mechanical Watches

Mechanical watches may experience slight deviations in timekeeping:

- **Normal Variations:** The NH35 movement has an accuracy tolerance of approximately -20 to +40 seconds per day under normal conditions.
- **Factors Affecting Accuracy:** Temperature fluctuations, the position of the watch, and the amount of activity can influence accuracy.
- **Regulation:** If you notice significant deviations, contact us at **support@soffiatimepieces.com.**

DAILY CARE

To preserve the quality and appearance of your watch:

Regular Cleaning:

Wipe off moisture, sweat, and dirt with a soft cloth to prevent corrosion and maintain the watch's luster.

Avoid Chemicals: Keep the watch away from cosmetics, detergents, solvents, and other chemicals that may damage its components.

Temperature and Humidity:

Avoid exposing the watch to extreme temperatures and high humidity to ensure longevity.

Band Care (Metallic Band)

The stainless steel band of your Soffia Aquamarino requires proper care.

Cleaning:

Use a soft brush to remove dust and dirt from the gaps in the band.

SOFFIA

HOW TO ADJUST YOUR FIVE -LINK BRACELET

Tools Needed:
A small precision screwdriver (typically 1.0mm or 1.2mm, flat-head).
A soft cloth to protect the bracelet.
Steps to Remove Links:

Identify the Screws: Look for the small screw heads on the side of the bracelet links.
Unscrew the Pin: Place the bracelet on a soft cloth to avoid scratches. Carefully insert the screwdriver into the screw head and turn counter-clockwise to loosen and remove the screw. Repeat this process to remove the necessary number of links.
Reattach the Bracelet: Align the remaining links. Insert the screw back into place and turn it clockwise to tighten securely.
Final Check: Ensure all screws are firmly tightened. Wear the bracelet to check the fit and comfort.

Tip: Be gentle when handling the screws to avoid stripping them. If they feel too tight, avoid forcing them and consider professional help.
